

Designed by the SAILONET design office, it is made by our SAILONET sailmaking partners, following our technical specifications.

This range is particularly suited to family coastal cruising, charter and long distances.

The gennakers in the JUPITER range are made from Polyester sailcloth (similar to heavy spinnaker cloth) in a weight adapted to your sail and the kind of sailing you do.

Sailonet gennakers are equipped with anti-torsion rope (luff more to 8m) which makes the furling manoeuvre easier. We can provide you with a furler suited to your boat and necessary to the best use of the gennaker.

The full inventory (anti-torsion rope, leech and foot lines, webbing-reinforced clew ring) optimizes and makes your gennaker easier to use.

Guarantee 2 years.

## JUPITER

Polyester sailcloth  
Weight adapted to the boat and the sailing program

assembly in Zigzag 6 steps

Sewing thread with specific sailmaking treatment

Leech and foot line with cleats

webbing-reinforced clew ring

Radial or stripes corner reinforcements
