

This range is specifically made for spinnakers and is adaptable to all sorts of yachts.

Designed by the SAILONET design office, it is made by our SAILONET sailmaking partners, following our technical specifications.

The Spinnakers of the ARIANE range are made from a specific nylon material elaborated for this use only. The sailcloth weight is adapted to your yacht and to your sailing requirements.

Asymmetric Spinnakers of the Ariane range are equipped with a luff line as standard for a better control.

The full inventory (large circular reinforcements, luff lines, circular bag) optimizes and makes your spinnaker easier to use.

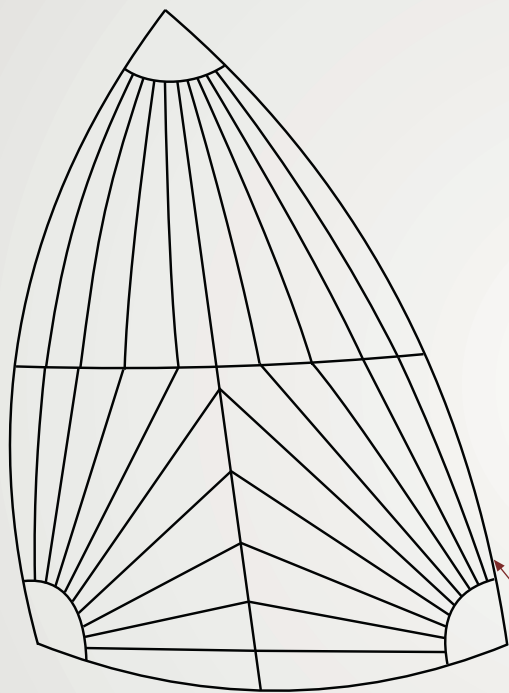

Guarantee 2ans.

ARIANE

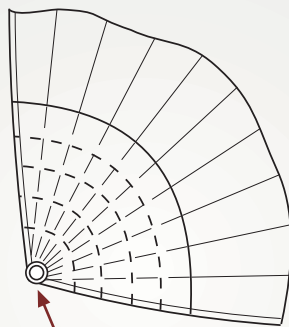

To make your Spinnaker, we use from a 0.75oz to a 1.5oz Nylon material, depending of the required surface. A maximum 3 colours is available from the range below.

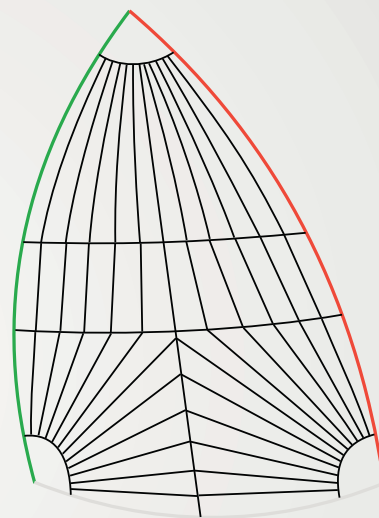

To help you to choose the right colours, use the Flash module on our site which will allow you to compare different colour pattern associations

Luff line for better effort controls

Stainless steel ring

Coloured braids to differentiate port to starboard when the spinnaker is in its bag

The number of panels used is calculated from the surface and the triangulation
